

CASA JEWEL

Together a world-renowned jewelry designer and a famous Mexican architect meticulously designed every facet of this stunning 'petite' castle home, creating a Moroccan-Spanish blended jewel. Live in another world with this extraordinary fusion of Moroccan architectural history and Mexican craftsmanship. Step into the 'grand sala' – front room featuring 35-foot handkerchief ceilings, arched iron windows, intricate iron work and a lion-themed pink Rosetta cantera (stone) fireplace. Here hand-finished adobe defined by sinuous curves gives this one-of-a-kind architectural style the romance of Marrakech and the mystique of old Andalusia. The impressive circular turret dining room glows with filtered light. Find drama and romance throughout, where of course, the bathrooms are fit for a kind...
