

TERRENO ESCULTOR F1

This super lot is located in a very secure and quiet area, thanks to an easement that connects from the main street to the lot in question, as well as to an adjacent lot also available for sale. The owner includes in the price a design for the construction of a house, as well as an impressive rock shown in the photographs; half of the rock belongs to this lot and the other half to the adjacent lot. The last photograph shows a property with walls built from this type of rock, highlighting the beauty and aesthetic potential of the material. Situated just a 10-minute walk from the Parroquia, and 20 minutes back due to the uphill path, this lot is perfect for ATV enthusiasts, as you can reach the lot quickly and easily find parking in the town center.
